Books of Subscription for the purchase of Shares of this Company, at \$75 a share, are open at our office; \$5 payable at the time of subscription, and the balance on May 2, 1884. Attention is called to the letter of Sam.
who has lately visited the property of the Company.
MORSE & Co., Attiention is called to the letter of Sam. F. Butterworth, esq.

No. 24 William-st., New-York.

I visited this Mine in the month of December, 1693, accompanied by Guido Knetel, the most distinguished Metallorgist and Mining Engineer on the Partin Coast, for many years the Manager of the Ophir Works, and author of a valuable treatise on the "Processes of Siliver and Gold Extraction," recently published in California. My opinion of the value and quality of this Mine is based on information derived from this gentleman, and on my own observations at the Mine.

The Mine is situated in Arizona, about three miles north of the northern boundary line of Sonora, and five miles distant from the december of the year, either by the way of Los Angeles, Liberiad, or Guaymas. But little work has been done in developing the Miner; enough, however, to discover the width and extent of the lode, and determine the quality and value of the ores.

Miners can be obtained in any number in the immediate vicinity, at about ten dollars per mouth.

The reduction works of the Mine are three miles distant from the Mine, consisting of a small engine and two formaces. There is an abundance of wood and water for all purposes on the property.

I consider the San Antonio a very valuable Silver Mine; if worked with skill and energy it will produce most satisfactory results.

SAM. F. BUTTERWORTH.
